

## Supplemental Figures

Figure S1 – Revised gene model for human *HTR2A*.

**Figure 1.** Human *HTR2A* gene structure. Exons are represented by black bars. The hatched portion of exon 2 represents exon 2tr. Common splice junctions are represented by solid, while dotted lines represent less common splice junctions. Refer to Table 2 for precise genomic coordinates and Table 3 for splice junction frequencies. *Note:* gene is encoded 3'-to-5' from left-to-right.
